

TRAILER HITCH STORAGE APPARATUS

ABSTRACT OF THE DISCLOSURE

A trailer hitch storage apparatus designed to carry a removable trailer hitch used in receiver type hitches. The apparatus consists of a frame comprising a mounting plate, at least
5 one bracket for supporting the trailer hitch extending from the mounting plate, a center
hanger that extends through the hitch pin hole on the trailer hitch, and a mounting
arrangement for attaching the mounting plate to the vehicle. Alternative embodiments
accommodate attachment to a truck or a vehicle such as an SUV having an enclosed
compartment. A quick-folding collapsible apparatus having the same general structure is also
10 described.
